## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-29, 31-34 and 36-47 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Murphy. Murphy shows an interactive advertising system for on-line terminals including receiving a credit card at 14 or 80, receiving transaction requests, see col. 6, lines 53-59 and col. 7, lines 46-50, sending transaction information to a first computer 10 or 30, sending transaction information to a second computer 22 or 36, selecting a presentation to be made to a user, see col. 3, lines 59-68 and col. 4, lines 64-68, sending a transaction response from the second computer and carrying out a financial transaction, see col. 6, lines 57-59 and presenting a coupon, see col. 2, lines 59-68 and col. 7, lines 46-50.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 30 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Murphy in view of Symonds et al. Murphy shows all the features of the applicants' claims except the particular message

format. Symonds et al teach in col. 11, lines 6-17 that the message format ISO 8583 is common in automated transaction machines. It would have been obvious to one of ordinary skill in the art in view of the showing and teaching of Symonds et al to use ISO 8583 message format in the automated transaction machines of Murphy.

***Specification***

6. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jheeta is cited to show an automated teller machine that dispenses coupons tailored to the customer profile. Lawlor et al is cited to show the ATM network with advertisers 84. The EPO publication is cited to show an ATM system with ads tailored to a user profile. The Japanese publication is cited to show the separate computers 13 and 15 for advertisement and transaction information.
